Coiled Tube Cable Sleeve

Bundle the clutter. Protect your cables.

The Brateck CMBT-HC-30-W neatly bundles and protects loose wiring for a cleaner living or working environment. Its flexible, expandable design accommodates different cable sizes while allowing individual cables to be easily rerouted or replaced.

Cable Protection

Conceals cables and protects them from abrasion and everyday wear.

Flexible Bundling

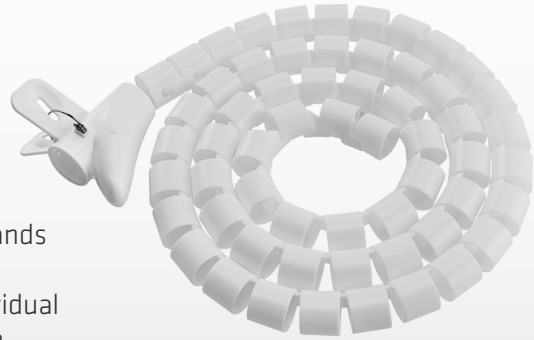

Expands around cables ranging from slim chargers to thicker power leads.

Tool-Free Setup

Installs around cables in minutes without tools or expert assistance.

Clean Cable Control Made Effortless

Flexible Protection with Easy Cable Breakouts

Made from durable polyethylene, this 1000mm × 30mm coiled sleeve expands to bundle cables ranging from slim phone chargers to thicker power leads. It keeps wiring concealed and protected from abrasion while allowing individual or multiple cables to branch out for easy rerouting or replacement—all with tool-free installation in minutes.

Features

Flexible Cable Bundling

The flexible and expandable sleeve adapts to different cable sizes, from slim phone chargers to thicker power cables. It keeps multiple cords neatly grouped without restricting their natural routing.

Clean Cable Organisation

Conceal loose and untidy wiring to create a cleaner living room, office or entertainment setup. The sleeve keeps cables together while still allowing individual cords to branch out where required.

Reliable Cable Protection

The polyethylene wrapping sleeve helps protect cables from abrasion and everyday wear. It also keeps loose cords contained, creating a safer and more organised environment around connected devices.

Quick Tool Free Setup

Simply wrap the sleeve around your cables for fast and convenient installation. No tools or professional expertise are required, while individual cables remain easy to reroute or replace when needed.
