

Adjustable Under-Desk CPU Mount with Sliding Track

Clearer Space, Easier Access.

Keep your computer tower securely positioned beneath the desk and away from valuable floor space. The CPB-5 combines an adjustable steel holder, smooth sliding track and 360° rotation to provide convenient access while keeping the workspace cleaner and more organised.

360° Easy Access

Rotates smoothly for convenient access to rear cables and ports.

Effortless Slide-Out

The easy-glide 325mm track brings your CPU within easy reach.

Space-Saving Design

Keeps your CPU securely under the desk and off the floor.

Saving More Space for Working Area.

A cleaner, more spacious workspace with easy access to your CPU.

The CPB-5 securely mounts your CPU beneath the desk, freeing up valuable floor and leg space for a cleaner, more comfortable working area. Its sliding track and 360° swivel keep the computer conveniently accessible whenever you need to reach cables, ports or controls.

Features

Effortless Slide-Out Access

The easy-glide sliding mechanism brings the computer tower forward whenever access is needed. A convenient pull rope makes moving the holder along its 325mm track quick and effortless.

Complete 360° Rotation

Rotate the computer tower through a full 360° to reach rear cables, ports and connections more easily—without crawling underneath the desk or moving the entire workstation.

Adjustable Tower Fit

The adjustable holder accommodates a wide variety of computer tower sizes. Its flexible height and depth settings help create a secure, stable fit around the equipment.

More Room, Less Floor Clutter

Under-desk installation keeps the computer tower away from foot space, floor-level dust and accidental contact. The elevated position creates a cleaner workspace while helping protect the equipment.
