

NUC Mounting Bracket

The Smarter Way To Mount Mini PCs

The Brateck VESA Compatible NUC Mounting Bracket is a durable and space-saving solution designed to securely mount mini PCs and Intel NUC devices behind monitors or under desks.

VESA-Compatible Design

Supports standard 75×75 mm and 100×100 mm VESA mounting patterns, making it compatible with most monitors and monitor arms.

Space-Saving Installation

Allows an Intel NUC or thin client PC to be mounted behind a monitor, creating a cleaner and more organized workspace.

Durable Steel Construction

Made from high-strength steel, providing reliable support and long-term durability.

NUC Mounting Bracket

The Smarter Way To Mount Mini PCs

Built with sturdy steel construction and VESA compatibility, it helps create a cleaner, more organized, and professional workspace while supporting devices up to 3kg.

Features

3 kg Load Capacity

Supports devices weighing up to 3 kg (6.6 lbs), suitable for Intel NUCs and many mini PCs.

Compact Form Factor

Measures approximately 255 × 120 mm, allowing installation without adding significant bulk behind the display.

Matte Black Finish

Features a professional matte black finish that blends seamlessly with modern monitor setups.

Compatible with Monitor Arms

Acts as an extension panel so users can mount both a monitor arm and a mini PC behind the same monitor, maximizing desk space efficiency.
