

Brateck

Maximize your view, reclaim your desk.

LDA30-114 DUAL GAS SPRING MONITOR ARM

The Brateck LDA30-114 is a highly flexible, space-saving full-motion wall mount designed for small-to-medium monitors and TVs. Its articulating arm allows you to smoothly extend, swivel, and tilt your display without tools to achieve a comfortable, glare-free view. Complete with integrated cable management, it folds back close to the wall to keep your creative or professional workstation completely clean and organized.

Full-Motion Articulation

Built with a robust single-arm extension structure, this mount smoothly pulls out from the wall and swivels laterally to let you reposition your display effortlessly. It ensures comfortable ergonomics whether you are sitting, standing, or shifting positions.

Flexible Wall Installation

Designed for versatile mounting on a variety of wall surfaces, allowing secure installation in offices, homes, workstations, and commercial environments for optimal space utilization.

CONCRETE

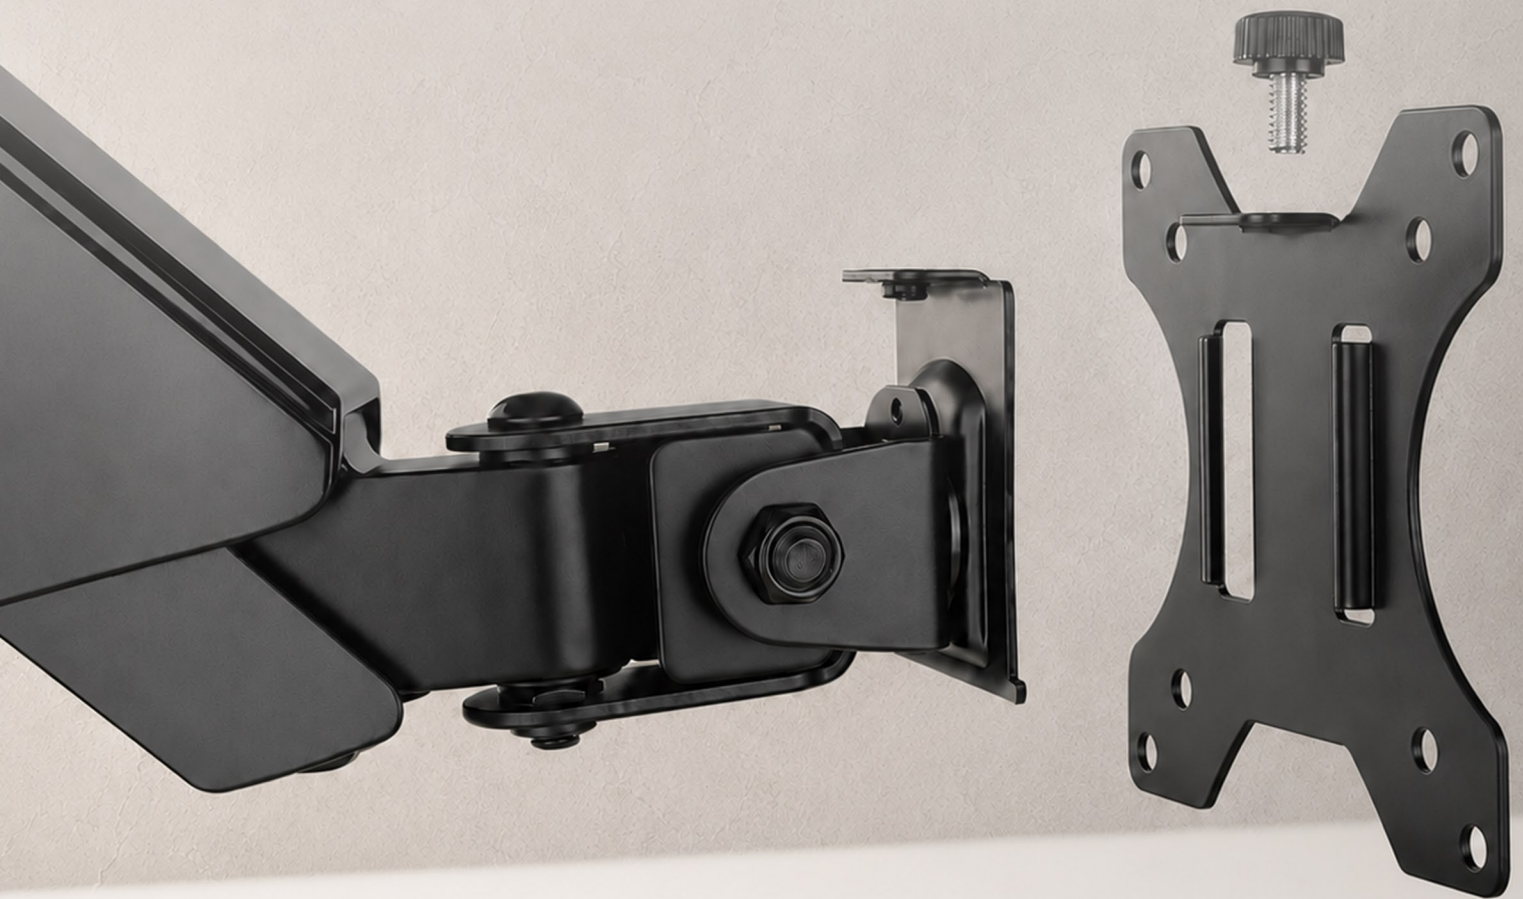

Integrated Cable Routing

Designed with built-in cable clips along the articulating arm, this mount neatly guides power cords and display cables down the frame. It keeps wires completely organized and out of the way when the arm is extending or folding back.

Multi-VESA Universal Fit

Equipped with a versatile universal interface pattern supporting common small-to-medium VESA standards (75×75mm and 100×100mm), this mounting plate guarantees accurate and secure alignment with a huge variety of global display monitors and small TVs.
