

Brateck

Vertical lift for dual-screen synergy.

LDS-22T02 MONITOR STAND

The **LDT22-T02** comes packed with user geared features such as removable VESA mounting plates, monitor height adjustment, integrated cable management. It raises two 17"-27" monitors in horizontal line to clear up your valuable work surface, at the same time allows for ergonomic viewing which encourages healthy body positioning.

Pneumatic Vertical Lift System

The integrated gas-spring mechanism allows you to raise or lower your dual 17"–27" monitors with minimal effort. This smooth, weightless adjustment encourages healthy body positioning by placing screens exactly at your eye level.

Versatile Freestanding Design

Engineered for maximum flexibility, this monitor stand features a sturdy, heavy-duty base that sits directly on your desk. This is the ideal solution for desks where clamping is not possible or for environments that require frequent layout reconfigurations.

Seamless Landscape-to-Portrait Flexibility

Achieve complete control over your dual display orientation. The mount supports full 360° screen rotation, allowing you to instantly switch between landscape for multitasking and portrait mode for specialized creative or coding workflows.

Integrated Cable Management & Protective Base

Keep your desk pristine and organized with built-in cable clips that tuck wiring neatly away. Additionally, the base features non-skid silicone pads to ensure the stand remains stable while protecting your desk surface from scratches or scuffs.
