Brateck

# Flexible viewing, simpler setup.

LDT13-C012E SINGLE SCREEN SPRING-ASSISTED MONITOR ARM

The **Brateck LDT13-C012E** combines ergonomic screen positioning with practical everyday functionality. Designed for 17″–32″ monitors weighing 2–9kg, it offers smooth spring-assisted adjustment, flexible viewing angles and a cleaner, more organised workspace.

## Spring-Assisted Balance

The built-in mechanical spring system helps counterbalance the monitor’s weight for smooth, controlled positioning. Adjust the screen height and viewing position with less effort throughout the working day.

# Keyhole VESA Mounting

The VESA plate features convenient keyhole mounting slots for easier monitor installation and removal. Compatible with 75×75mm and 100×100mm VESA patterns.

# Flexible Viewing Control

Tilt the screen from +90° to −45°, swivel it 90° left or right and rotate it through 360° to achieve a comfortable portrait or landscape viewing position.

# Flexible Desk Installation

Both clamp and grommet mounting hardware are included to suit different desktop configurations. Integrated cable management guides wiring along the arm for a cleaner and more organised setup.
