Brateck

Connect Easier.
Work Smarter.

USB PORT EXPANSION

The **Brateck LDT20 Series USB Port Expansion** is a practical workstation accessory designed to provide more convenient USB access when used with compatible LDT20 Series monitor arms. Its 1.8m cable offers flexible routing, helping users connect without constantly reaching behind their computers.

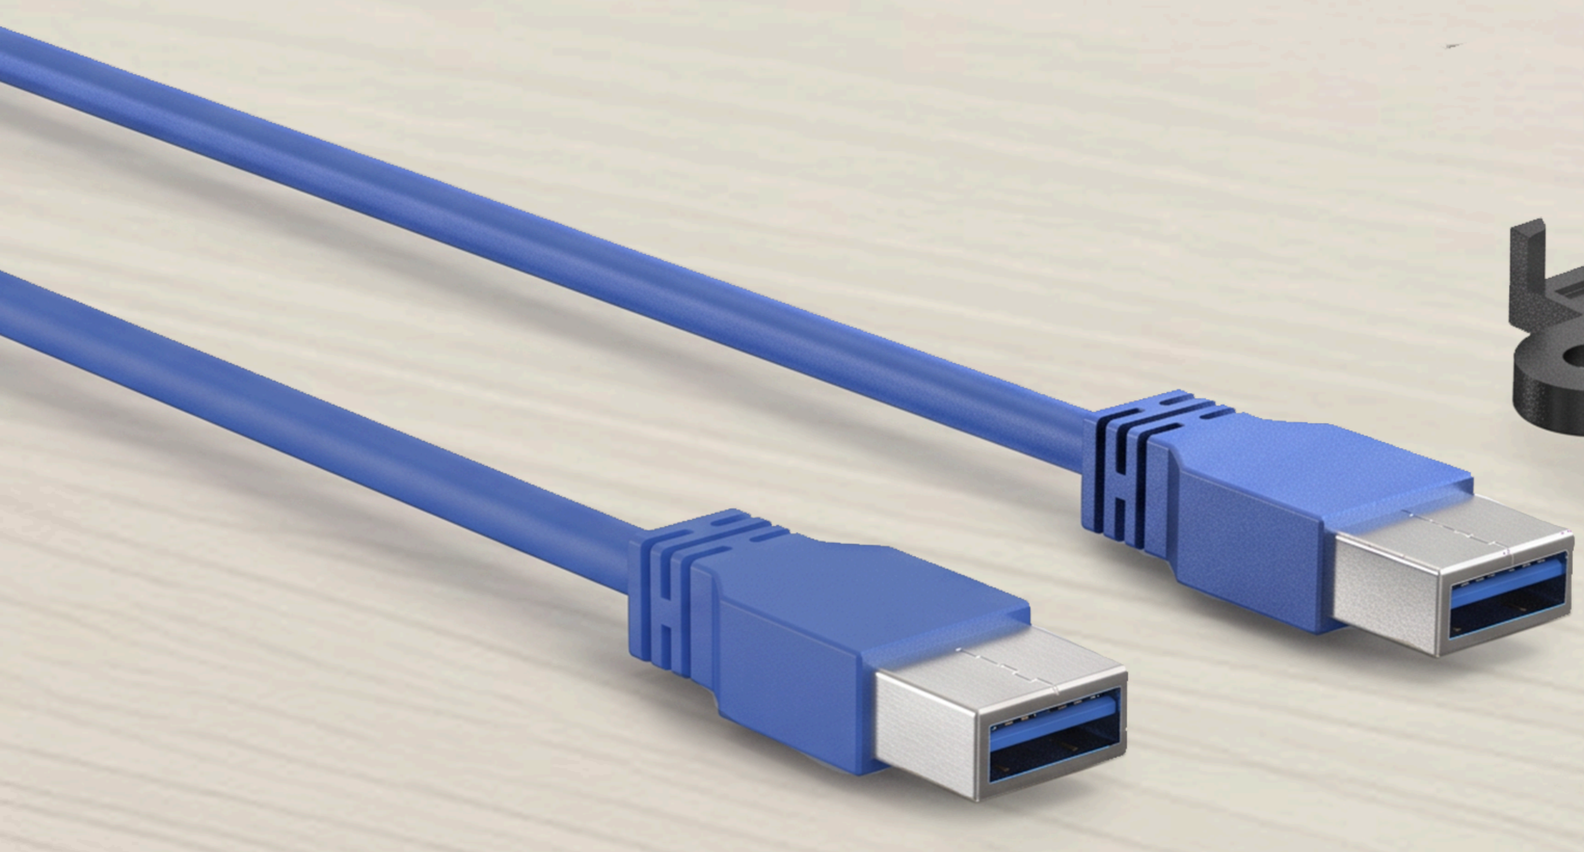

Designed for LDT20 Series Monitor Arm

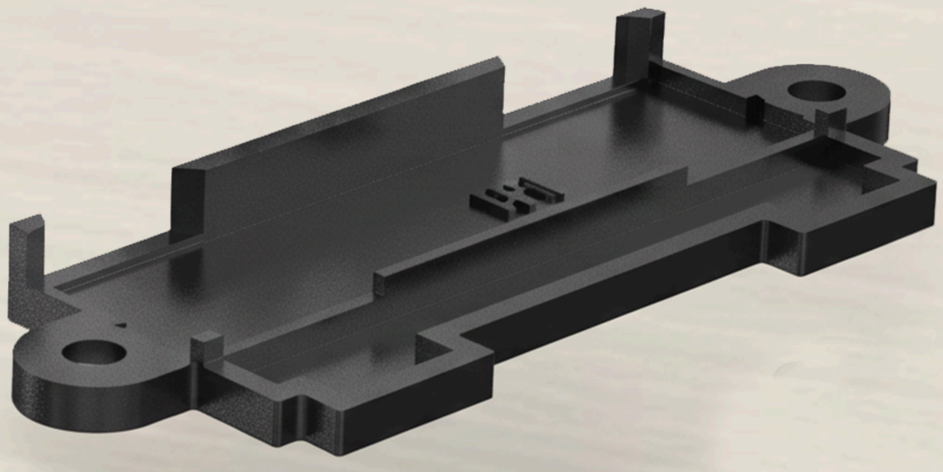

Developed as an expansion accessory for the Brateck LDT20 Series, offering a practical way to improve workstation connectivity without replacing an existing compatible monitor arm.

Durable PVC Cable Construction

Features a 5.0mm outer-diameter cable with a PVC jacket and 28AWG/28AWG data conductors, providing a practical construction for everyday USB connections.

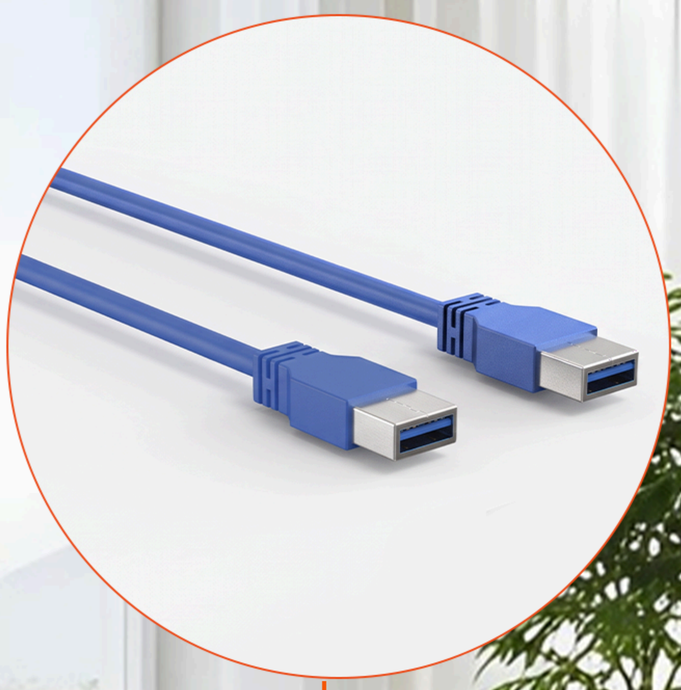

Extended 1.8m Cable

Features a 1.8-metre cable that provides flexible routing options, allowing users to position their USB connection more conveniently around a monitor arm and desk setup.

Convenient USB Accessibility

Designed to extend USB access closer to compatible workstations, making it easier to connect everyday USB peripherals without repeatedly reaching behind a desktop computer.
