

Brateck

Fluid motion, perfect balance.

LDT23-C024 DUAL GAS SPRING MONITOR ARM

The **Brateck LDT23-C024** is an ergonomic dual-monitor arm featuring a high-performance gas spring counterbalance system for weightless, fluid adjustments. Built with a smart tension gauge and a quick-release VESA design, it makes setup and custom weight calibration incredibly simple. Perfect for active multitasking setups, it keeps your dual displays aligned while reclaiming valuable desktop space.

Gas Spring Counterbalance

Equipped with a premium internal gas spring mechanism, this dual mount perfectly offsets the weight of your monitors. It allows you to effortlessly float, raise, lower, or extend your displays with a gentle touch for instant ergonomic comfort.

Detachable VESA Plate

Designed with a user-friendly, quick-release VESA plate system. Simply mount the plate to the back of your monitor, then slide and lock it onto the arm from an upright position without struggling to hold up the display's weight.

Integrated Cable Management

Built-in cable covers guide power and display cords seamlessly along the structural arms, keeping them hidden and tangle-free even during high-range, multi-angle adjustments.

Flexible Grommet and Clamp Installation Standards

Out of the box, the base supports both heavy-duty desk clamp and grommet-hole installations. It securely fastens to a massive variety of desks without demanding permanent structural modifications to your workspace.
