

Brateck

Bigger screens, bolder setup.

LDT49-C024-B PREMIUM SLIM SPRING ARMS

The **Brateck LDT49-C024-B** is a heavy-duty, spring-assisted dual monitor arm engineered to support massive curved and ultrawide displays with complete stability. Featuring a smooth mechanical counterbalance mechanism, detachable VESA plates, and hidden cable routing, it lets you reposition heavy screens effortlessly while maintaining an ultra-clean, ergonomic workstation.

Spring-Assisted Counterbalance

Features a high-performance mechanical spring system that counteracts monitor weight, allowing you to float, tilt, swivel, and raise both screens smoothly with a single touch to maintain ideal ergonomic alignment.

Detachable VESA Plates

Equipped with quick-release VESA plates that detach from the arm structure. Simply attach the plate to the back of your display and slide it effortlessly onto the mount without lifting the entire assembly.

High Weight Capacity

Built with a reinforced structural core, this arm effortlessly supports large, heavy screens—including curved and ultrawide models—with up to 20kg (44lbs) capacity per arm, ensuring zero sag across your entire setup.

Dual Desk Mounting Options

Out of the box, the heavy-duty base supports both desktop edge clamping and through-desk grommet installations, giving you a rock-solid, wobble-free anchor point regardless of your workspace layout.
