

Dual Monitors Premium Slim Aluminum Spring-Assisted Arms

Bigger screens, bolder setup.

The Brateck LDT49-C024-B is a heavy-duty, spring-assisted dual monitor arm engineered to support massive curved and ultrawide displays with complete stability. Featuring a smooth mechanical counterbalance mechanism, detachable VESA plates, and hidden cable routing, it lets you reposition heavy screens effortlessly while maintaining an ultra-clean, ergonomic workstation.

Quick-Release VESA Plate

Enables fast and effortless monitor installation or removal without dismantling the entire mounting arm.

Built-in Spring Gauge

Provides a clear visual guide for accurately adjusting the spring tension to suit the monitor's weight.

Tension Indicator

Helps maintain consistent spring tension across multiple monitor arms for balanced and uniform positioning.

Ultimate Slim Spring-Assisted Flexibility

Engineered with a slim aluminum profile and built-in rotation stop to keep your dual-screen setup perfectly balanced and protected.

By combining an internal mechanical spring, a visual tension indicator, and a 180° rotation stop in a sleek aluminum body, this dual monitor arm gives you weightless, precise control over two 17"-32" screens up to 9kg (19.8lbs) each without swinging into walls.

Features

Spring-Assisted Counterbalance

Features a high-performance mechanical spring system that counteracts monitor weight, allowing you to float, tilt, swivel, and raise both screens smoothly with a single touch to maintain ideal ergonomic alignment.

High Weight Capacity

Built with a reinforced structural core, this arm effortlessly supports large, heavy screens—including curved and ultrawide models—with up to 20kg (44lbs) capacity per arm, ensuring zero sag across your entire setup.

Detachable VESA Plates

Equipped with quick-release VESA plates that detach from the arm structure. Simply attach the plate to the back of your display and slide it effortlessly onto the mount without lifting the entire assembly.

Dual Desk Mounting Options

Out of the box, the heavy-duty base supports both desktop edge clamping and through-desk grommet installations, giving you a rock-solid, wobble-free anchor point regardless of your workspace layout.

Specifications

Material

Steel, Aluminum, Plastic

Color

Fine Texture White, Space Grey

Dimensions

43" x4.6" x23.8"

Fit Size

17"-32"

VESA Compatible

75x75, 100x100

Weight capacity per screen

2~9kg
