Effortless glide for ultimate focus

LDT63-C024-B MONITOR ARM

The **LDT63-C024-B** Dual Monitor Arm Mount is an economical choice for adding flexibility and ergonomics to the workplace. Durable steel and aluminum construction enables each arm to hold most 17"-32" monitors up to 9kg/19.8lbs (per arm). Finger-tip adjustment allows for effortless maneuvering and a wide range of motion to position screen height and angle.

Counterbalance Spring-Assisted Mechanism

Featuring a self-adjusting mechanical spring, this arm allows you to raise, lower, and position your dual displays with a gentle touch. It provides fluid, weightless motion to match your perfect ergonomic eye level.

Built-In 180° Rotation Stop

Designed with a clever integrated rotation brake, the arm is prevented from swinging backwards into adjacent walls, glass panels, or neighboring desks. This makes it ideal for compact office cubicles and flush wall layouts.

Dual 9kg Capacity & Curved Screen Support

This durable steel and aluminum mount safely supports two flat or curved screens from 17" to 32", holding up to 9kg (19.8lbs) per arm. It delivers rock-solid, wobble-free stability for expansive creative setups.

Quick-Release Joint & Slim Aesthetic

The slim, modern silhouette includes built-in cable management channels to hide unsightly wires. Additionally, its quick-release joint system simplifies user assembly while maintaining a clean, distraction-free aesthetic.
