

Dual Monitor Economical Spring-Assisted Monitor Arm

Effortless glide for ultimate focus.

The LDT63-C024-B Dual Monitor Arm Mount is an economical choice for adding flexibility and ergonomics to the workplace. Durable steel and aluminum construction enables each arm to hold most 17"-32" monitors up to 9kg/19.8lbs (per arm). Finger-tip adjustment allows for effortless maneuvering and a wide range of motion to position screen height and angle.

Spring-Assisted Mechanism

Features a counterbalance system that allows smooth, finger-tip fluid movement to adjust screen height up and down effortlessly.

Built-in Rotation Stop

An integrated 180-degree hard stop prevents the arms from swinging backwards into partition panels, walls, or glass screens.

Quick-Release Joint Design

Allows the arm segments to snap together or separate rapidly without tools, making the initial desk setup and future relocations fast and effortless.

For Most 17"-32" Monitors

Counterbalance Spring-Assisted Mechanism

Featuring a self-adjusting mechanical spring, this arm allows you to raise, lower, and position your dual displays with a gentle touch. It provides fluid, weightless motion to match your perfect ergonomic eye level.

Features

Built-In 180° Rotation Stop

Designed with a clever integrated rotation brake, the arm is prevented from swinging backwards into adjacent walls, glass panels, or neighboring desks. This makes it ideal for compact office cubicles and flush wall layouts.

Quick-Release Joint & Slim Aesthetic

The slim, modern silhouette includes built-in cable management channels to hide unsightly wires. Additionally, its quick-release joint system simplifies user assembly while maintaining a clean, distraction-free aesthetic.

Dual 9kg Capacity & Curved Screen Support

This durable steel and aluminum mount safely supports two flat or curved screens from 17" to 32", holding up to 9kg (19.8lbs) per arm. It delivers rock-solid, wobble-free stability for expansive creative setups.

Keyhole VESA Pattern

The VESA plates feature a specialized keyhole shape, allowing you to slide and hang monitors into place for rapid setup.
