

Gaming Monitor Arm

Maximum Performance in a More Compact Design.

Built for gamers and professionals who want maximum performance in a cleaner, more compact mounting design, the Brateck LDT95-C012UC Atlas Neo Gaming Monitor Arm.

Compact Direct-Mount Design

Mounts directly from the desk base without the additional vertical pole, creating a cleaner, lower-profile setup.

Large Monitor Compatibility

Designed for a wide range of large gaming and productivity displays.

Detachable VESA Plate

Makes monitor installation and removal faster and more convenient.

Gaming Monitor Arm

Maximum Performance in a More Compact Design.

Its direct-to-desk mounting structure creates a more streamlined setup while still providing smooth height, tilt, swivel and rotation adjustment.

Features

Smart Base with USB-A & USB-C Ports

Integrated connectivity at the base provides convenient data transfer or device charging, with snap-off access plates for a cleaner setup.

Top-Side Installation

Installs entirely from above the desk surface for easier setup and access.

360° Rotary VESA Plate

Supports full screen rotation for greater flexibility in portrait, landscape or customised viewing configurations.

No Additional Pole

Unlike the UCP's 388mm pole, the UC uses a streamlined direct-to-desk mounting structure.
